Product and Service Codes

Introduction

SEQual has adopted the [United Nations Standard Products and Services Code](#) (UNSPSC®) to classify products and services. This is an open, global, multi-sector standard used in the energy industry worldwide.

The UNSPSC code set is constantly evolving to reflect changing business needs. SEQual aims to work with the Buyer and Supplier community to ensure the codes available within SEQual accurately reflect the products and services currently provided in the energy industry. Feedback and enquiries on codes can be directed to the Scheme Manager via scheme.manager@sequal.co.uk.

The full set of codes in use can be accessed by registered Suppliers within the SEQual platform and is available to all via the [code browser on the SEQual website](#).

While this supporting document is accurate at the time of publication, the codes in use within SEQual are subject to frequent updates. Please refer to the online code browser to confirm the current status of any particular code or activity.

Activities

Every product code is available with one or more selectable Activities. When selecting a code, at least one Activity must be included.

Codes referring to products are relevant to multiple Activities, while codes referring to services are relevant to only the 'Supply' Activity.

The requirement for On-site Assessment is determined by Activity. Please refer to the online code browser [on the SEQual website](#) or within the SEQual platform for full details of all Activities available for each code, and the associated Desktop or On-site Assessment requirements.

Activity	Description
A) Supply	<ul style="list-style-type: none"> Provision of finished goods for sale and/or rental. Provision of services, including consultancy, studies, and/or personnel.
B) Manufacture	<ul style="list-style-type: none"> The processing of raw materials or parts into finished goods using tools, human labour, machinery, and chemical processing.
C) Install, Test and Commission	<ul style="list-style-type: none"> Install – To build and/or put in place. Test – Trialling or proving capabilities. Commission – The process of assuring that all systems and components are designed, installed, and tested according to operational requirements of the owner or end-user.
D) Service	<ul style="list-style-type: none"> Provision of routine maintenance. Provision of modification and/or repair work. Thorough examination and inspection.
E) Design and Engineering	<ul style="list-style-type: none"> The specification of requirements needed to satisfy the customer and other relevant external parties. Translation of already identified requirements into a specification that will conform to stated requirements.
F) Decommission	<ul style="list-style-type: none"> Remove/withdraw from service. Make inoperative and dismantle safely and in an environmentally responsible manner. <p><i>Note, this Activity refers to any withdrawal of equipment; it is not specific to the industry lifecycle stage of decommissioning.</i></p>
